Please read this manual very carefully before wearing your helmet and keep it in a safe place. For a correct use and for your safety, please pay attention to following instructions. The main function of the helmet is to protect your head in case of impact. This helmet is made to absorb some of the energy of a blow by partial destruction of its component parts and, even though damage may not be apparent, any helmet which has suffered an impact in an accident or received a similarly severe blow or other abuse should be replaced. To maintain the full efficiency of this helmet, there must be no alteration to the structure of the helmet or it's component parts.
